

TITAN

WELD DESTRUCT TOOLS

A welder wearing blue protective gear and a white leather glove is using a Honsa Titan tool to destroy a weld. The tool is a long, black, cylindrical device with a silver-colored metal tip that has a small, sharp, pointed end. The welder is holding the tool with both hands, and the tool is positioned against a metal surface. The background is a dark, industrial setting with a blue diagonal stripe running across the image.

INCREASED DURABILITY
SUPERIOR POWER
TIMESAVING COMBINATION

TRUST THE ONLY MANUFACTURER WHO MAKES TOOLS
SPECIFIC FOR THE QUALITY WELD DESTRUCT INDUSTRY

Made from the finest, hardened, alloy steel, Honsa® Titan Weld Destruct Tools are designed especially for efficient destructive weld testing of mild, boron or dual-phase steel. When used in combination with our custom Honsa® Titan Weld Destruct Chisels, you'll experience the toughest, longest lasting tool and chisel combination available anywhere, at any price. Additionally, you'll see measurable improvements in your weld destruct productivity, while providing operator relief from harmful vibration and musculoskeletal injuries.

A POWERFUL COMBINATION

HONSA® TITAN WELD DESTRUCT TOOLS

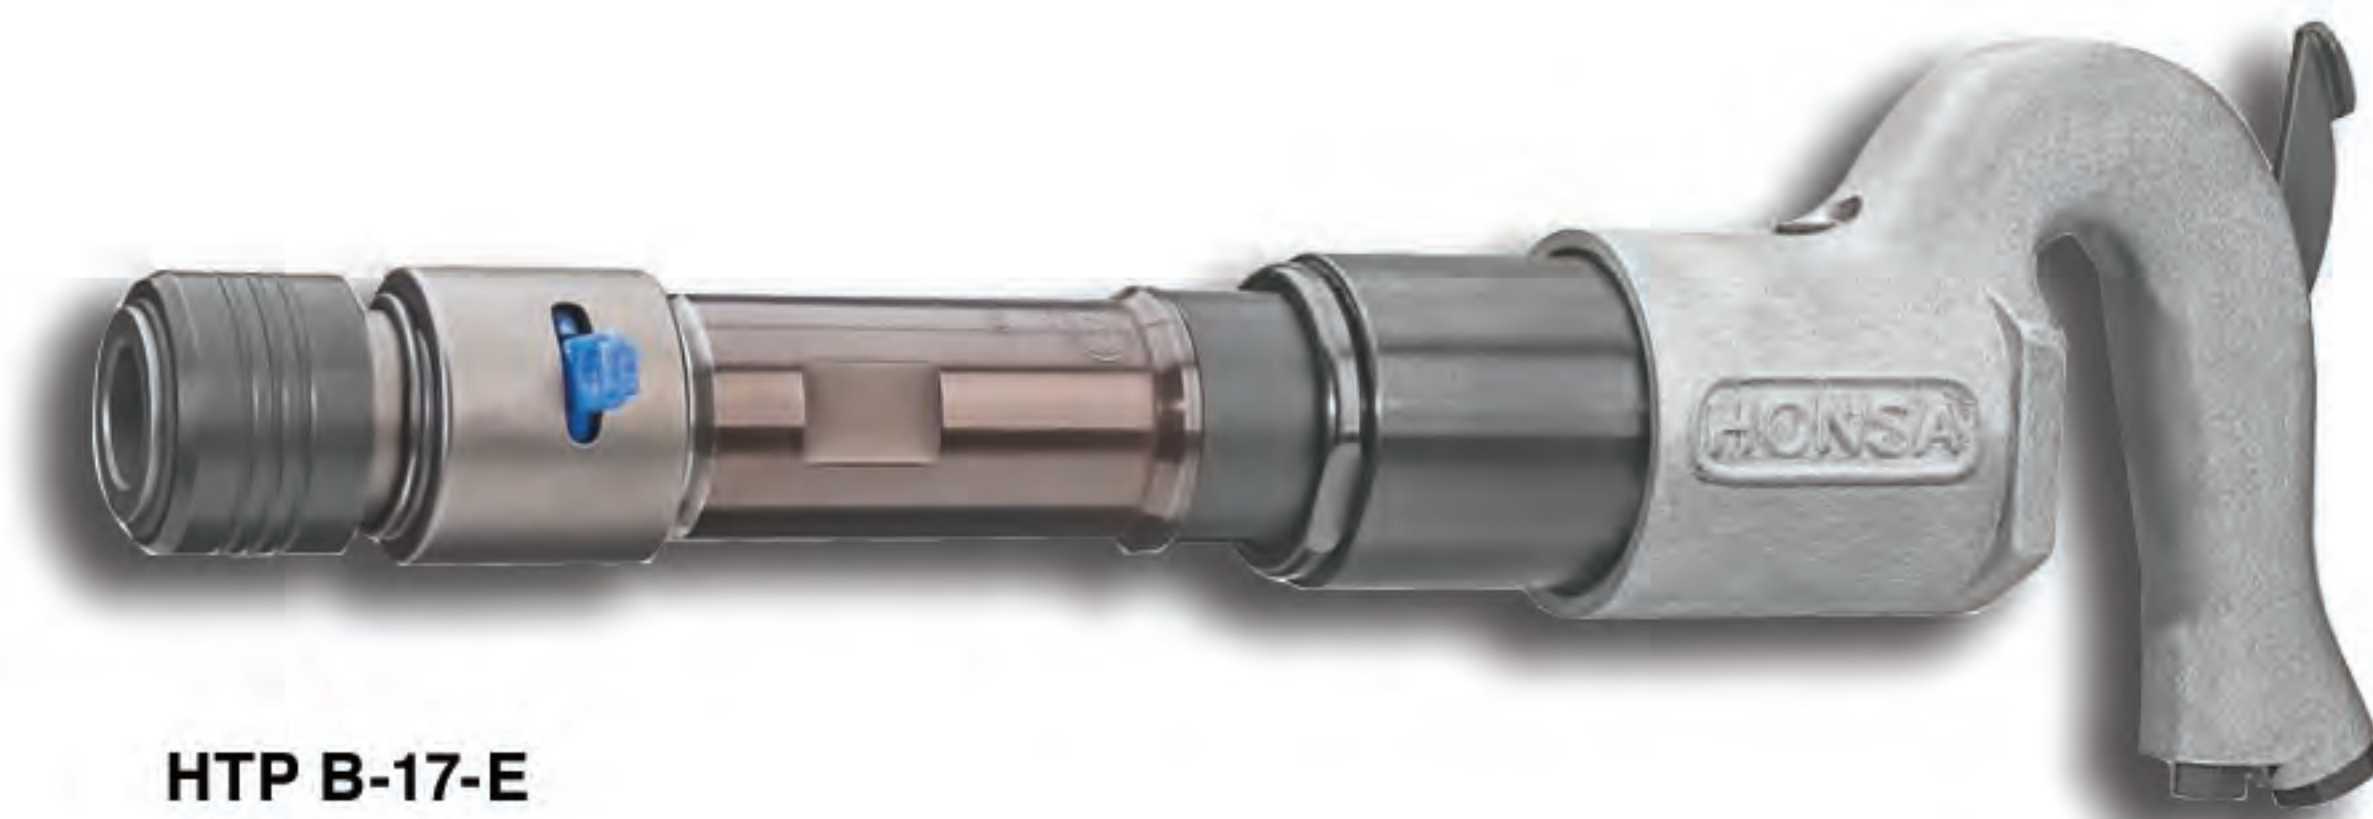

Honsa® Titan Weld Destruct Tools not only create a safer workplace by exposing operators to less vibration, you will see measurable improvements in your weld destruct productivity with the toughest, longest lasting tools on the market.

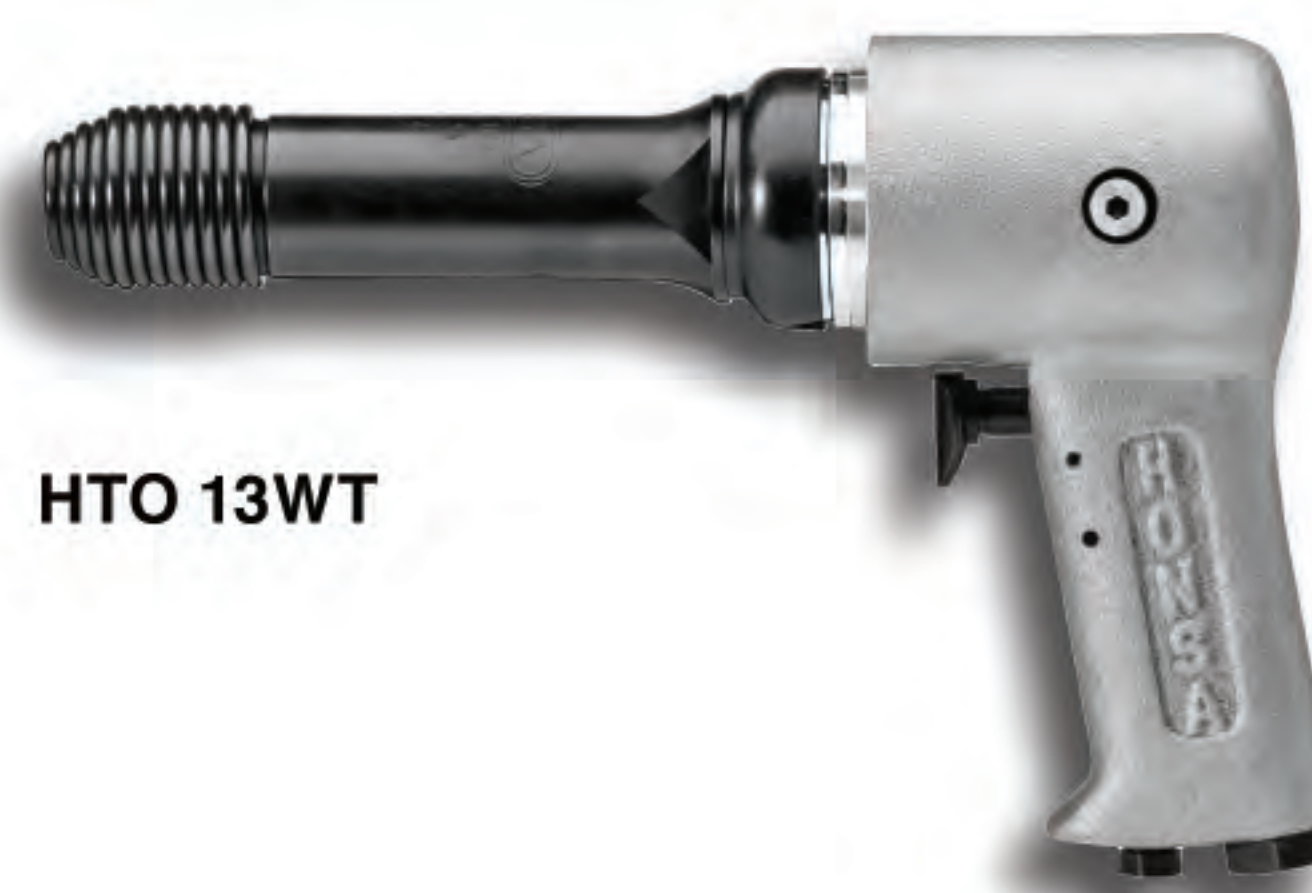

HTC 11-4R
